Dear Mrs Morgan

I am writing to urge you to take action to limit climate change. The issue of global warming is not just affecting us it's affecting the whole world at an alarming rate. Over the past 100 years, we have had the hottest weather ever in 2015 to 2018. Global warming is rising at a rapid pace we are definitely going to struggle to adapt to our new climate as we grow older. So I am asking you to slow down climate change.

Your voice matters and I am asking you to help stop all types of climate change, starting with deforestation; 17% of trees have been cut down in the rainforests. Less CO₂ is being absorbed due to trees being cut down.

Because of our actions 9% of polar animals die per decade which is deeply concerning not just to polar animals this is also a concern to penguins.

To conclude these are all very bad things that we don't need. I would like you to use your public voice to spread about what everyone can do to help. I eagerly await your response.
