Dear Mrs Morgan,

I am writing to inform you that our local area is being exposed
by global warming's our animals are sick of this mess we are making.
Food is ticking because one day the world will come to nothing.
Since the global warming has been taking over the world and our day to day.
Our world is changing rapidly so we need to change it.

I am deeply concerned about climate change, around the world there are
natural disasters they are normal but they are getting more common.
For example: Harsh droughts, Extreme seasons and wild fires.
Because of this 10 species die a day. Over 150 years people have been using
fossil fuels. To help there are the things we can do. More wind turbines.
Solar panels, more solar panels at school.

I am sure you want the world to be a better place like I do.
So I will be waiting for a response if you would like to.

Your sincerely,
