Dear Mrs Morgan,

I am writing to you to inform you about the crisis of Climate Change. The reason is that Climate Change has enlarged over the past years is that we are damaging the planet by creating harmful greenhouse gases like CO_2 that warm the air.

In the Arctic circle ice packs are separating. It may not look like a problem to us since we are not near the north or south poles but it is a problem for polar animals that live there. You may think they can just swim but it is freezing cold water and they can not swim that far which leads to death. You are a kind person don't let these innocent creatures die because of our actions.

The weather that Climate Change creates is harmful for both us and animals. It is dangerous for people that live near oceans because tsunamis happen. These are the causes that happen on Earth: Hurricanes, drought and more this may happen to us soon.

These are some of the things that can help the Earth: use recyclable bags don't litter and use your public voice. Please help save the Earth.

Yours sincerely
