Monday 11th March 2024

Dear Mrs Morgan,

I am writing to you to express my concerns about the crisis of climate change. The reason is, 250 species are dying every day also people have been using fossil fuels for over 150 years; the land and ocean is hotter than it's been before.

The polar bears are dying because the ice sheets are melting at an alarming rate of 1cm per decade (10 years) which does not seem like a lot but for the arctic animals it is. Down in South America, the Amazon Rainforest is also getting threatened by people chopping down trees at 17% per decade.

We can help the planet by: planting more trees, walking more, get solar panels and use reusable cups. In 2015 till 2018 our climate reached the warmest it has ever got, with temperatures reaching to 52°C and we don't want that to happen again.

I await for your response and I hope you take action soon. I also hope you use your voice to tell the public why climate change matters.
