Dear Mrs Morgan

I am writing to you to inform you to help our planet now. The harm of global warming is destroying our planet and we need to join hands and work together to save our earth. Animals are dying, places are getting more clogged in smog, and humans health is getting worse. In some of countries people are losing fresh water due to the temperature rising and droughts.

If you want to get voted maybe help more on climate change. The weather we can not change but we can change the way people act upon it. Could you please request your constituents to recycle, and use your public voice to say not to harm our planet.

Yours sincerely
