Dear Mrs Morgan,

I am writing to express my concerns about global warming, climate change and urge you to take action about 256 species of animals are dying. HOW would you like to tackle the problem of climate change? The gases in the factory's need get stopped immediately. The forest fires are turning out really bad animals are in there. In Antarctica the ice keeps melting bit by bit help. The poor animals such as polar bears, Lapland is extremely cold and forest fires going down very much. We need to stop this!

70% of trees are getting chopped down from global warming we are trying to keep our environment good and fresh.

We need to stop this before it's too late, use your public voice because your voice matters. After reading this I hope you can stop this immediately. Thank you very much!

Your sincerely,
