I am writing to inform you to take action to the following paragraph. Climate change is affecting the world in a long time. Since 1970s is giving this, I am asking you to take charge. A 4 there are over 200 hundred species a becoming extinct a day. 17% of the Amazon is getting dropped down in total. Global warming is destroying the ice in the arctic and the polar bears are dying. We are counting on us to make a change. This is terrible. We should just see and solve such the problem. I advise you to support me to make this mission public.

Yours sincerely
