Dear Mrs Morgan,

I am writing to you so you can take action on climate change, the climate rapidly increasing releasing more gases into the air this is affecting the whole world not just one country so im asking for your help to stop it.

250 species are going extinct everyday which is sad especially thinking that 750 are dying a month which is not exepable and the ocean is being polluted on this and causing an emense amount of fish to die.

I hope you can do something about this

Yours sincerely
