Dear Mrs Morgan

I am writing to urge you to reduce the risks of climate change. Our planet is being filled with harmful gases and more plastic in our oceans. As a result of this the ice caps are melting and all the polar animals are in danger and there are risks of them drowning.

I would like to express my concerns about our animals. About 206 species of animals are dying a day, people who are causing deforestation, are destroying our animals habitats and then they would not have any place to take shelter. Animals are dying because of adaptation what they have adapted to is what they live of so if it were to change they would possibly die.

Your public voice can change a difference in this world.
Yours Sincerely
