Dear Ms Morgan,

I am writing to inform you about the severe effects of global warming. The effects of it effects everyone whether it is: smog, water pollution or toxic gases in the air. We all need to work together to conquer global warming.

Were you to recycle every day thousands of species would be saved from extinction. The temperature started to rise in 1880; this is due to big industrial machines starting to get popular.

With an upcoming election, I am sure you want to put a good image in your constituents mind. I suggest you use your public voice to promote recycling. I will be eagerly awaiting your response.

Yours Sincerely,
